

DIMMER COMPATIBILITY LIST

FOR PRO SERIES RECESSED LED PANEL LIGHT

RECOMMENDED

MANUFACTURER	PART NO.	TYPE	MAX. PER DIMMER		
			7004	7004-4K	7006
LUTRON	DVELV-300P	ELECTRONIC LOW VOLTAGE	12	12	NC
LUTRON	SELV-300P	ELECTRONIC LOW VOLTAGE	12	12	NC
LEVITON	IPE04-1LZ	ELECTRONIC LOW VOLTAGE	12	12	12
LEVITON	No. 6615	ELECTRONIC LOW VOLTAGE	12	12	12
WATTSTOPPER	HDCL-453M	LED / CFL	12	12	12
LUTRON	SFTU-5A3P	FLUORESCENT	12	12	12
LUTRON	DVCL-153P	LED/CFL/INCANDESCENT	12	12	12
LUTRON	CTCL-153P	LED/CFL/INCANDESCENT	12	12	12

TROUBLESHOOTING FOR FLICKERING ISSUES

The light may flash when the load is too small on the dimmer. However, most of the dimmers that seem to be affected by this phenomenon are adjustable dimmers.

Here is how to adjust the dimmer:

- 1- Place the dimmer main lever at it's minimum
- 2- Adjust the side lever or thumb-wheel until the flashing disappears.

We have noticed compatibility issues with some LED / CFL specific dimmers, we strongly recommend that your dimmer selection corresponds to our dimmer list or any ELV dimmer.
